Totality™

Driven by a relentless pursuit of excellence, Totality™ is a research and development methodology for the advancement of hygiene, innovation and technology in refreshment systems.

Ultra-violet sterilising system
For added hygiene confidence, appliances can be fitted with Viovandt™ – an ultra-violet sterilisation process that reduces water-born bacteria.

World-class filtration
For the ultimate drinking experience, appliances can be pre-fitted with a 3M filter to reduce sediment, chlorine, odours and scale.

Laboratory certified 99.999% bacteria-free
Every appliance undergoes an anti-microbial, antipathogen, sanitising procedure. The reassurance of hygienically safe appliances is provided by the unique bacteria-eliminating process, Sterizen™.

Beautifully refreshing.

Additions for F4

Beautifully refreshing.

Sanitisation kit
Six monthly sanitising cycles ensure appliances function at the optimum hygiene levels.

Install kit with 3M filter
Install appliances simply and effectively in a wide range of applications. Complete with a 3M filter.

Ultra-violet filter kit
Complete Viovandi™ filter kit to assist in water purification and removal of unwanted micro-organisms.

Bottle filler blanking plate
For applications where the swan-neck bottle filler isn't required.

Wall & floor bracket set
For unstable surfaces and added safety and security, ideal for areas of high-traffic.

Waste pump kit
Transports water to a distance of up to 10 metres.

Rear cover
Fixes appliance to the wall to protect plumbing and electrical connections.
